Work permission: Eligible to work full-time in Ireland without an employment permit or sponsorship.

Looking for a junior digital design, UI or web design role, remote or Dublin hybrid. I design interfaces in Figma and build them myself in HTML, CSS and JavaScript. Four years teaching before the MSc.

DESIGN SKILLS

Interface design: Design systems and tokens, typography, layout, visual hierarchy, dark mode

Process: Wireframing, user testing, iteration on feedback, content structure, responsive design

Accessibility: ARIA states, keyboard navigation, colour contrast, prefers-reduced-motion

Tools: Figma, Adobe Creative Cloud, Git and GitHub

Build: HTML5, CSS3, JavaScript, Astro, WordPress, Tailwind, p5.js

Languages: English (fluent), Mandarin Chinese, Bahasa Melayu

SELECTED WORK

Somewhere Still Lead designer and developer · Three.js, GLSL somewhere-still-griffith.netlify.app

- MSc dissertation by practice, four-person team: a browser experience on Alzheimer's built as a descent into deep water, so the interface performs the symptom instead of naming it
- Wrote the design language: colour that identifies a person and never a control, three typefaces separating character, interface and system voice, with interaction signifiers drawn from Norman
- User testing showed the signifiers had gone too quiet. Fixed it with a three-state cursor rather than dropping the principle.

GrifHub Group lead and lead UX/UI designer · Figma figma.com/proto

- A learning platform designed to replace Moodle at Griffith College, prototyped for mobile and desktop by a three-person team working in Goal-Directed Design
- Owned the information architecture through three research-driven revisions, sixteen annotated wireframes, five user flows and all nineteen high-fidelity screens
- Informal testing with five students found the dashboard Quick Stats card duplicated the row above it. Replaced it rather than defending it.

Camus Tribute Design system, accessibility · HTML, CSS, JavaScript camus-tribute.netlify.app

- Designed and built an eleven-page site on Albert Camus, with a visual language drawn from mid-century paperback typography
- Around 50 design tokens, which made a complete dark mode a remap of the same names rather than a second stylesheet

Memory Vault Product design and full-stack build · Astro, Supabase, Tailwind memoryvault-451.netlify.app

- Designed and built an archive application with accounts, a browsable library and a commenting layer, reading Fahrenheit 451 as a product brief

Also in the portfolio Interaction design and creative coding

- Do Androids Dream?, an empathy test in p5.js that scores how you draw rather than what you draw, selected for the MSc Interactive Digital Media creative showcase; Ireland SOS, a student survival guide entered through a phone call that refuses to be declined; Flowers for Algernon, a generative piece driven by one Gaussian function

EDUCATION

MSc Interactive Digital Media, Griffith College Dublin 2025 to 2026
First Class Honours (1.1)

BA Digital Humanities, Dundalk Institute of Technology 2015 to 2019
Second Class Honours, Grade 1 (2.1)

EXPERIENCE

Secondary School Teacher, Foon Yew High School, Malaysia 2020 to 2024

- Designed my own teaching materials: slides, worksheets and interactive classroom activities, used in lessons every week
- Rewrote the parts students did not follow, lesson by lesson, using what happened in the room as the feedback
- Presented the same material three ways, for students, for parents and for staff

Online Tutor, Self-employed, Malaysia 2021 to 2024

Content and Translation Assistant, Part-time 2023 to 2024
